This "Coun" expels the miasmatic poison of Faven and Acoun from the system and provents the development of the disease, if taken on the first approach of its premaiture symptoms. It is stand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the seme cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invisorate it by healthy food and exercise. Such a medicine we supply in
